

SeaReenergy is an independent provider of comprehensive services for all offshore wind industry stakeholders. We are involved in the whole value chain from T&I concept design and installation to operations & maintenance. We offer consulting and engineering services, as well as offshore marine services, QHSE services and the full range of offshore professionals.

We are currently looking for an

Offshore HSE-Manager (m/f/d)

Your tasks would be:

- Providing HSE requirements for works to be conducted
- Checking that executed works are according to PtW system
- Preparation of relevant QHSE documentation
- Checking and preparing risk assessments
- Cooperation during determination and reporting of HSE key performance indicators
- Supporting the offshore personnel in all QHSE related matters
- Acting as Emergency Response Team Leader
- Conducting inspections and preparing reports
- Cooperation during the implementation and advancement of the client's QHSE-Management System

Your Profile:

- Completed engineering degree
- Preferably German Occupational Health and Safety Engineer (Sifa) or equivalent qualification (i.e. NEBOSH Int.)
- At least two years' work experience in a similar position
- Experience in QHSE project support
- Experience in the offshore wind industry desirable
- Good knowledge of relevant environmental topics (garbage management, dangerous cargo, MARPOL)
- Fluent English skills (spoken and written)
- BOSIET or GWO Sea Survival & HUET incl. CA-EBS
- Offshore Medical Certificate incl. chester step and spirometry test
- Working at Heights Certificate (not older than one year)
- First Aid incl. AED training
- ERT Leader Certificate or STCW Advanced Firefighting

You can expect a challenging and diversified job. The place of work will be offshore.

Please send your application with your expected daily rate, your earliest possible starting date and copies of your certificates to: jobs@searenergy.com.
